Ok. Would have been helpful to let the group know that. As you can see, they' re talented at seeing
ghosts everywhere.

Davis,

I have reviewed your email from this morning to Peter Saba and Rich Gold. We are disappointed with the deletions you have made from the discussion topics on the agenda. If EPA wants the PRP Group at this Superfund Site to move forward with its process to facilitate earlier rather than later implementation of remedy, then these subjects should not be dropped. In addition, we think detailed discussions with the potentially responsible parties, prior to EPA decisions being made on these matters, is needed.

Jeff

Davis & Sheryl,

I am working on finalizing our meeting logistics for Thursday, October 18.

Ken Tyrrell, Project Coordinator – Portland Harbor, from AECOM will join in person for the Pre-RD Work discussion (focused on unvalidated data request) scheduled for the last part of the meeting, tentatively Noon to 1 PM.

The senior chemist (Karen Mixon) and data management expert (Mike Surowiec) will join for that part of the meeting by phone.

To ensure that we have sufficient room in the conference room please advise the anticipated EPA attendees. I will circulate a dial-in once we have reconfirmed the location.

Thanks, Peter

To: 'Bilbrey, Sheryl' <Bilbrey.Sheryl@epa.gov>; Zhen, Davis <Zhen.Davis@epa.gov>

Subject: Oct. 18 Meeting Agenda and Attendees

ENFORCEMENT CONFIDENTIAL

Sheryl & Davis,

As requested attached is a proposed agenda for the meeting on October 18.

Please note that a draft of the agenda was circulated and discussed with a subcommittee of representatives of the PCI Private Business Group and that this draft is being shared with the PCI Private Business Group.

The PCI Private Business Group is a group of businesses in and around the Portland Harbor Superfund Site which span a range of industries across different sectors of the economy. The PCI Private Business Group does not include the City of Portland, State of Oregon or the United States. The statements made and views contained in the attached document are those of the PCI Private Business Group, and no statement or view expressed in the attached document is made on behalf of the identified public entities.

Set forth below is a list of the attendees. We are not anticipating having anyone participate by phone, but can set up a dial-in if EPA needs one.

As previously discussed with Sheryl, we are planning to set aside the last part of the meeting (we would suggest the last hour) for a discussion just involving Pre-RD AOC Group Participants and EPA on Pre-RD Work matters, particularly the EPA request for all unvalidated data and how best to meet EPA's data needs while minimizing some of the concerns we have. At the end of the day, we share a common objective here which is the collection and reporting of accurate and reliable data regarding current conditions at the Site to inform the remediation, which data is accepted by EPA, the PRPs and the larger community. We anticipate Ken Tyrrell and one or two of his team that are involved in the data management effort to join us for that portion of the meeting. Once I have confirmed with Ken who will be attending, we will provide that info as well.

Please let me know if you have any questions on the agenda or the meeting logistics.

Best, Peter

AGENDA Meeting with EPA

Thursday, October 18, 2018
10:00 am – 1:00 pm Pacific
AECOM Portland Office
111 SW Columbia Street, 15th Floor
Portland, OR 97201

By Phone: Personal Privacy / Ex. 6

Part I: Flexibility in Decision Tree and ROD; Other Technical Issues

- Recap from the technical meeting
- Discussion of whether decision tree and ROD reflect the flexibility that was discussed; and if not, whether and how to address it (ad hoc, discretionary basis, or something else?)
- Integration of Data
- FAQ process (scope/input/timing)
- Other technical issues (if any)

Part II: Post Pre-RD Timeline

- <u>Shared Goals</u>: avoiding gaps in activity, demonstrating continuing progress on cleanup, achieving a fair and timely allocation process that maximizes the number of settling parties, and ensuring that we use the time between now and completion of the Pre-RD work to be in a position to move forward with the Post-PR Process.
- Post Pre-RD Process:
 - Early Action Projects/ Identification of Sites/SMAs to move forward with Remedial
 Design While the PRP attendees cannot speak for the sponsors of such projects, it would be helpful for the larger PRP group to understand what framework or process EPA is envisioning for moving forward and rolling those out
 - Source Control/Sufficiency Assessment Critical to demonstrate clean up progress to date and continuing progress prior to proceeding with remedial actions to minimize recontamination
 - Sequencing Should the site be split up for purposes of proceeding with remedial activities; should remediation projects be sequenced based on readiness to proceed, based on location in waterway, or based on concentration of contaminants of concern
 - Other Potential Elements
 - Additional Sampling Work
 - Discussion on non-participating PRPs

Part III: Planning for EPA Participation at Next PCI Group Meeting (December 5-6)

Part IV: Pre-RD Work - Technical Discussion (~12pm-1pm)

Enforcement Confidential

Thank you for the updated list of attendees and updated agenda. My only suggestion on the agenda is to reverse the order of Items III and IV so that the PCI Group members attending that are not Pre-RD AOC signatories can participate in discussion of the planning on the PCI Group meeting and can then depart prior to discussion of the unviaidated data issue.

Hi Peter,

I am resending the list of participants. Attached please find EPA's suggestions to the agenda topics. I have included the new location and call-in information as part of the revision.

Below are the participants from our end:

In Person Participants:
Sheryl Bilbrey
Cami Grandinetti
Davis Zhen
Sean Sheldrake
Eva DeMaria
Hunter Young
Dean Ingemansen
Lori Cora

Via Phone
Stephanie Ebright
Stephanie Mairs
Karl Gustavson
Scott Coffey & CDM staff (for technical discussions only)

Thanks,

Davis Zhen, Manager Site Cleanup Unit 2 Office of Environmental Cleanup 1200 Sixth Avenue Suite 155 M/S ECL – 122, Seattle, WA 98101

Subject: RE: Oct. 18 Meeting Agenda and Attendees

Davis & Sheryl,

I am working on finalizing our meeting logistics for Thursday, October 18.

Ken Tyrrell, Project Coordinator – Portland Harbor, from AECOM will join in person for the Pre-RD Work discussion (focused on unvalidated data request) scheduled for the last part of the meeting, tentatively Noon to 1 PM.

The senior chemist (Karen Mixon) and data management expert (Mike Surowiec) will join for that part of the meeting by phone.

To ensure that we have sufficient room in the conference room please advise the anticipated EPA attendees. I will circulate a dial-in once we have reconfirmed the location.

Thanks, Peter

Subject: Oct. 18 Meeting Agenda and Attendees

ENFORCEMENT CONFIDENTIAL

Sheryl & Davis,

As requested attached is a proposed agenda for the meeting on October 18.

Please note that a draft of the agenda was circulated and discussed with a subcommittee of representatives of the PCI Private Business Group and that this draft is being shared with the PCI Private Business Group.

The PCI Private Business Group is a group of businesses in and around the Portland Harbor Superfund Site which span a range of industries across different sectors of the economy. The PCI Private Business Group does not include the City of Portland, State of Oregon or the United States. The statements made and views contained in the attached document are those of the PCI Private Business Group, and no statement or view expressed in the attached document is made on behalf of the identified public entities.

Set forth below is a list of the attendees. We are not anticipating having anyone participate by phone, but can set up a dial-in if EPA needs one.

As previously discussed with Sheryl, we are planning to set aside the last part of the meeting (we would suggest the last hour) for a discussion just involving Pre-RD AOC Group Participants and EPA on Pre-RD Work matters, particularly the EPA request for all unvalidated data and how best to meet EPA's data needs while minimizing some of the concerns we have. At the end of the day, we share a common objective here which is the collection and reporting of accurate and reliable data regarding current conditions at the Site to inform the remediation, which data is accepted by EPA, the PRPs and the larger community. We anticipate Ken Tyrrell and one or two of his team that are involved in the data management effort to join us for that portion of the meeting. Once I have confirmed with Ken who will be attending, we will provide that info as well.

Please let me know if you have any questions on the agenda or the meeting logistics.

Best,

Peter

AGENDA Meeting with EPA

Thursday, October 18, 2018 10:00 am - 1:00 pm Pacific

AECOM Portland OfficeRing Bender LLP 621-SW Morrison, Suite 600111 SW Columbia Street, 15th Floor

Portland, OR 972015

By Phone: Personal Privacy / Ex. 6

Formatted: Superscript

Part I: Flexibility in Decision Tree and ROD; Other Technical Issues

- Recap from the technical meeting
- Discussion of whether decision tree and ROD reflect the flexibility that was discussed; and if not, whether and how to address it (ad hoc, discretionary basis, or something else?)
- Integration of Data
- FAQ process (scope/input/timing)
- Other technical issues (if any)

Part II: Post Pre-RD Timeline and Process "Plan B"

- Shared Goals: avoiding gaps in activity, demonstrating continuing progress on cleanup, achieving
 a fair and timely allocation process that maximizes the number of settling parties, and ensuring
 that we use the time between now and completion of the Pre-RD work to be in a position to move
 forward with the Post-PR Process/Plan B.
- Post Pre-RD Process / Potential Elements of "Plan-B":
 - Early Action Projects/ Identification of Sites/SMAs to move forward with Remedial
 <u>Design</u> —While the PRP attendees cannot speak for the sponsors of such projects, it would
 be helpful for the larger PRP group to understand what framework or process EPA is
 envisioning for moving forward and rolling those out
 - Source Control/Sufficiency Assessment Critical to demonstrate clean up progress to date
 and continuing progress prior to proceeding with <u>remedial actions to minimize remedy</u>
 implementation to avoid material risk of recontamination
 - Sequencing Should the site be split up for purposes of proceeding with remedial
 activities; should remediation projects be sequenced based on readiness to proceed, based
 on location in waterway, or based on concentration of contaminants of concern
 - o Consent Agreement Process
 - * Discussion of one versus multiple Consent Agreements
 - Should next Consent Agreement(s) be for RD/RA or rust for RD
 - Development of process to identify PRPs that should be performing parties (e.g., at particular SMAs) and facilitate their agreement to do so
 - Development of Model Consent Agreement for Portland Harbor or development of model provisions of key terms for use in Portland Harbor Consent Agreement(s)
 - o Other Potential Elements
 - Additional Sampling Work
 - Process for EPA to identify and pursue Discussion on non-participating PRPs

Enforcement Confidential

Commented [ZD1]: EPA is currently looking at options but has not reached any decisions on how to get RD for the entire site. As such, EPA cannot engage in discussion of how EPA many proceed with an enforcement and cleanup strategy with the PRPs. However, EPA is open to listening PRP thoughts on these topics and consider them when we finalize our approach after getting approval from the RA and AAs.

Commented [ZD2]: Same comment as above

Part III: Technical Discussion on Unvalidated Data (~12pm-1pm)

Part IV: Planning for EPA Participation at Next PCI Group Meeting (December 5-6)

Enforcement Confidential

Subject: Fwd: Portland Harbor - EPA letter October 9, 2018

Flag: Follow up

This is the bullshit we deal with. You already knew all this but just to reiterate, I represent the private sector folks. You're letter was imprecise in describing my role. The city, state (and DoD) "opt out" and aren't part of my discussions because they don't (or in the case of DoD, cant) participate in "lobbying.". Jeff and Loren are co-chairs of the entire pci group (including opt outs) which makes this all the more confusing. Anyway, there are those at EPA in the counsel's office who enjoy fostering these types of divisions. So, to be clear, I work for the PCI Private Business Group which is everyone but the government opt outs. The Dec 5th meeting will include the entire PCI Group including the opt outs. Anyway, back to work. Have a good weekend. Sorry for the distraction.

Subject: Portland Harbor - EPA letter October 9, 2018
```

We were surprised to receive the attached letter which was forwarded to us today by the PCI Group Co-Chairs. Please note that Rich Gold is a lobbyist hired by some PRPs and does not represent all PCI members. The City and State cannot participate in such outside lobbying efforts. The City, State and Federal PCI participants are not part of the Holland and Knight lobbying work nor are they informed about the work Mr. Gold conducts or the conversations that he has with EPA. Mr. Gold does not and cannot represent the PCI Group.

Your letter indicates a desire to have EPA communicate with the entire PCI Group. To effectuate that, we wanted to clarify that communications with and through Holland and Knight are not communications with the PCI Group. Further, communications with Co-Chairs Loren Dunn and Jeff Ring are only communications with the entire PCI Group when it is clear that they are communicating with EPA on behalf of the entire PCI Group, rather than in their capacity as representatives of the Pre- Remedial Design Group, which has only four members, or as participants in the lobbying efforts noted above, neither of which are on behalf of the entire PCI Group.

If you have any questions don't hesitate to contact us.

Nanci Klinger & Lynne Perry

Sheryl and Lori,

Nanci Klinger Sr. Deputy City Attorney Office of Portland City Attorney N.Klinger@portlandoregon.gov<mailto:N.Klinger@portlandoregon.gov>

Subject: Portland Harbor PCI group Co-chairmen of Steering Committee

Hello, Loren. I trust you are well and enjoying your new law firm. I'm writing to confirm the names of the co-chairs of the PCI Group steering committee. From previous meetings, I understood that you and Jeff Ring are co-chairs. Is that still the case? I'm asking because EPA wants to send correspondence to the co-chairs soon. Thanks.

  Subject: Re: Follow up meeting with PCI (sf)
 Correct that you don't have a room at epa Portland that can hold that size group, right? (PCI mtg in Dec
 is in Portland, not Seattle. Oct 18 meeting we will come to you in Seattle).

For oct 18 yes pls on room. Let me check on our room size for dec. Not sure what hotel we're at. You guys don't have anything big enough in Portland office right?

On Sep 25, 2018, at 1:00 PM, Bilbrey, Sheryl <Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov>

Ok got it. Do you want us to find a room here in our office for the Oct 18th? We can send out a notice to the larger PRP group. Do you have a room big enough should others show up?

Subject: Re: Follow up meeting with PCI (sf)

My bad. Yes the group from July to talk tech followup but other issues as well (we're working on agenda). Presume 18th is better so we'll plan on that.

We have everyone who participates at PCI including port, city, state etc. If you wanted to...or wanted us to...to send out notice to the other PRP's who never show, I'm sure we could do that for the part of the meeting you guys are at. Let me check. That said, I think we want folks to be able to have a good, frank conversation, so we don't want it to be a "public" meeting with press etc.

I may be the one who's confused. I thought you and I talked about another technical meeting but if we need to meet with group from July that's fine. It's really up to you all.

On a related note - as I mentioned we are agreeable to coming to your meeting on the 5th or 6th but also need to reach the PRPs that are not in the PCI group. Would you be willing to invite others or do we need to hold a separate meeting after December for all the PRPs?

Subject: FW: Follow up meeting with PCI (sf)

See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They variously described their intended audience as all PH PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience.

Subject: [EXTERNAL] Follow up meeting with PCI (sf)

Hello Howard,

Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last week. Would the date of October 18 or 30th work for you all? On a related note, could other PCI members participate in case they have the same/similar questions, e.g. public entities?

Thank you.

S

Subject: Portland Harbor PCI group Co-chairmen of Steering Committee

Hello, Loren. I trust you are well and enjoying your new law firm. I'm writing to confirm the names of the co-chairs of the PCI Group steering committee. From previous meetings, I understood that you and Jeff Ring are co-chairs. Is that still the case? I'm asking because EPA wants to send correspondence to the co-chairs soon. Thanks.

  Subject: Re: Follow up meeting with PCI (sf)
 Correct that you don't have a room at epa Portland that can hold that size group, right? (PCI mtg in Dec
 is in Portland, not Seattle. Oct 18 meeting we will come to you in Seattle).

```

For oct 18 yes pls on room. Let me check on our room size for dec. Not sure what hotel we're at. You guys don't have anything big enough in Portland office right?

On Sep 25, 2018, at 1:00 PM, Bilbrey, Sheryl <Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov><mailto:Bilbrey.Sheryl@epa.gov>

Ok got it. Do you want us to find a room here in our office for the Oct 18th? We can send out a notice to the larger PRP group. Do you have a room big enough should others show up?

Subject: Re: Follow up meeting with PCI (sf)

My bad. Yes the group from July to talk tech followup but other issues as well (we're working on agenda). Presume 18th is better so we'll plan on that.

We have everyone who participates at PCI including port, city, state etc. If you wanted to...or wanted us to...to send out notice to the other PRP's who never show, I'm sure we could do that for the part of the meeting you guys are at. Let me check. That said, I think we want folks to be able to have a good, frank conversation, so we don't want it to be a "public" meeting with press etc.

I may be the one who's confused. I thought you and I talked about another technical meeting but if we need to meet with group from July that's fine. It's really up to you all.

On a related note - as I mentioned we are agreeable to coming to your meeting on the 5th or 6th but also need to reach the PRPs that are not in the PCI group. Would you be willing to invite others or do we need to hold a separate meeting after December for all the PRPs?

While Sean's email makes it sound like Howard or another of our entourage asked for a follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to bold enough people. They want to be a staff mentioned as all PH

PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience.

Subject: [EXTERNAL] Follow up meeting with PCI (sf)

Hello Howard,

Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last week. Would the date of October 18 or 30th work for you all? On a related note, could other PCI members participate in case they have the same/similar questions, e.g. public entities?

Thank you.

S

Subject: Re: Follow up meeting with PCI (sf)

Flag: Follow up

We'll put agenda together. It's the same crew as last time (July 11th) which is the negotiating team PCI has selected. So NWN is trying to go around the process by saying they want to come which isn't going to happen as it was an arduous process to get the team approved. That team is:

Linda Baker - technical, Pre-RD Howard Cumberland - technical, Pre-RD Clark Davis -PCI Representative Loren Dunn - Pre-RD Legal Rich Gold - Political Čounsel, PCI Dimitri Karakitsos - Political Counsel, PCI Jeff Ring - Legal Counsel, Pre-RD Peter Saba - Legal Counsel, Pre-RD

I'll try and get you agenda by end of week.

Ok, minor tweak. Is there a shot we can do Oct 18 in Portland that day? There is a mtg that moon the PRP side so just trying to make it all work logistically. Let me know. I understand this may be a pain for your guys. If not possible, we'll try and figure something out.

Correct that you don't have a room at epa Portland that can hold that size group, right? (PCI mtg in Dec
is in Portland, not Seattle. Oct 18 meeting we will come to you in Seattle).

My bad. Yes the group from July to talk tech followup but other issues as well (we're working on
                               Presume 18th is better so we'll plan on that.
agenda).
```

We have everyone who participates at PCI including port, city, state etc. If you wanted to...or wanted us to...to send out notice to the other PRP's who never show, I'm sure we could do that for the part of the meeting you guys are at. Let me check. That said, I think we want folks to be able to have a good, frank conversation, so we don't want it to be a "public" meeting with press etc.

Is this the group mtg you and II were discussing which was the same group we had in July or is this another tech mtg? Just confused.

We proposed a mtg on 18th to 19 of Oct with the group from July, not just tech.

See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They variously described their intended audience as all PH PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience.

Hello Howard,

Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last week. Would the date of October 18 or 30th work for you all? On a related note, could other PCI members participate in case they have the same/similar questions, e.g. public entities?

Thank you.

Sean Sheldrake RPM, Unit Diver Officer U.S. Environmental Protection Agency 1200 Sixth Avenue, Suite 155, M/S DOC-01 Seattle, WA 98101 206.553.1220 desk 206.225.6528 cell

 Subject: Re: Follow up meeting with PCI (sf)
Correct that you don't have a room at epa Portland that can hold that size group, right? (PCI mtg in Dec
is in Portland, not Seattle. Oct 18 meeting we will come to you in Seattle).

 For oct 18 yes pls on room. Let me check on our room size for dec. Not sure what hotel we're at. You
guys don't have anything big enough in Portland office right?

Is this the group mtg you and II were discussing which was the same group we had in July or is this another tech mtg? Just confused.

We proposed a mtg on 18th to 19 of Oct with the group from July, not just tech.

Subject: FW: Follow up meeting with PCI (sf)

How does this fit in with any discussion you have had with Sheryl as to the next meeting? Note this comes from Sean (at Sheryl's request) and the opening for other PCI members to participate - specifically mentioning public entities.

Subject: FW: Follow up meeting with PCI (sf)

See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They variously described their intended audience as all PH PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience.

Hello Howard,

Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last week. Would the date of October 18 or 30th work for you all? On a related note, could other PCI members participate in case they have the same/similar questions, e.g. public entities?

Thank you.

S

Yes October 18th we'll come to Portland if you can find a location. Our Portland office conference room
is booked
Thanks
Sheryl Bilbrey

 Subject: Re: Follow up meeting with PCI (sf)
Correct that you don't have a room at epa Portland that can hold that size group, right? (PCI mtg in Dec
is in Portland, not Seattle. Oct 18 meeting we will come to you in Seattle).

I thought you and I talked about another technical meeting but if we need to meet with group from July that's fine. It's really up to you all.

On a related note - as I mentioned we are agreeable to coming to your meeting on the 5th or 6th but also need to reach the PRPs that are not in the PCI group. Would you be willing to invite others or do we need to hold a separate meeting after December for all the PRPs?

Subject: Fwd: Follow up meeting with PCI (sf)

Is this the group mtg you and II were discussing which was the same group we had in July or is this another tech mtg? Just confused.

We proposed a mtg on 18th to 19 of Oct with the group from July, not just tech.

Subject: FW: Follow up meeting with PCI (sf)

How does this fit in with any discussion you have had with Sheryl as to the next meeting? Note this comes from Sean (at Sheryl's request) and the opening for other PCI members to participate - specifically mentioning public entities.

Subject: FW: Follow up meeting with PCI (sf)

See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They variously described their intended audience as all PH PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience.

Hello Howard,

Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last week. Would the date of October 18 or 30th work for you all? On a related note, could other PCI members participate in case they have the same/similar questions, e.g. public entities?

Thank you.

S

Flag: Follow up

We don't. We would need to schedule something special which is fine. But a lot of people are already in Portland for this mtg...fingers crossed.

Hi Rich

As you know the Feds are on Holiday this Wed. We've put in a request for an exception to allow us to work but it may not be granted. Do you have a PCI meeting in January that we could go to if we are not allowed to work on Wed? I'll keep you posted as soon as I hear anything. Sorry!

Hi Jeff,

We are in the process of finalizing agenda topics for the meetings on 12/4 and 12/5, and would like to inform you that while topics are similar, the information that the EPA plans to present may be different. I would encourage members of the PCI group to participate in both meetings. I look forward to seeing you next week. Have a nice weekend.

Thanks,

I may be the one who's confused. I thought you and I talked about another technical meeting but if we need to meet with group from July that's fine. It's really up to you all.

On a related note - as I mentioned we are agreeable to coming to your meeting on the 5th or 6th but also need to reach the PRPs that are not in the PCI group. Would you be willing to invite others or do we need to hold a separate meeting after December for all the PRPs?

Is this the group mtg you and II were discussing which was the same group we had in July or is this another tech mtg? Just confused.

We proposed a mtg on 18th to 19 of Oct with the group from July, not just tech.

How does this fit in with any discussion you have had with Sheryl as to the next meeting? Note this comes from Sean (at Sheryl's request) and the opening for other PCI members to participate - specifically mentioning public entities.

Subject: FW: Follow up meeting with PCI (sf)

See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a

venue large enough to hold enough people. They variously described their intended audience as all PH PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience.

Subject: [EXTERNAL] Follow up meeting with PCI (sf)

Hello Howard,

Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last week. Would the date of October 18 or 30th work for you all? On a related note, could other PCI members participate in case they have the same/similar questions, e.g. public entities?

Thank you.

S

I may be the one who's confused. I thought you and I talked about another technical meeting but if we need to meet with group from July that's fine. It's really up to you all.

On a related note - as I mentioned we are agreeable to coming to your meeting on the 5th or 6th but also need to reach the PRPs that are not in the PCI group. Would you be willing to invite others or do we need to hold a separate meeting after December for all the PRPs?

Is this the group mtg you and II were discussing which was the same group we had in July or is this another tech mtg? Just confused.

We proposed a mtg on 18th to 19 of Oct with the group from July, not just tech.

While Sean's email makes it sound like Howard or another of our entourage asked for a follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times

during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They variously described their intended audience as all PH PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience.

Subject: [EXTERNAL] Follow up meeting with PCI (sf)

Hello Howard,

Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last week. Would the date of October 18 or 30th work for you all? On a related note, could other PCI members participate in case they have the same/similar questions, e.g. public entities?

Thank you.

My bad. Yes the group from July to talk tech followup but other issues as well (we're working on
            Presume 18th is better so we'll plan on that.
agenda).
We have everyone who participates at PCI including port, city, state etc. If you wanted to...or wanted us
to...to send out notice to the other PRP's who never show, I'm sure we could do that for the part of the
meeting you guys are at. Let me check. That said, I think we want folks to be able to have a good, frank conversation, so we don't want it to be a "public" meeting with press etc.

Subject: FW: Follow up meeting with PCI (sf)

See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They variously described their intended audience as all PH PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience.

Subject: [EXTERNAL] Follow up meeting with PCI (sf)

Hello Howard,

Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last week. Would the date of October 18 or 30th work for you all? On a related note, could other PCI members participate in case they have the same/similar questions, e.g. public entities?

Thank you.

S

Subject: Re: Follow up meeting with PCI (sf)

My bad. Yes the group from July to talk tech followup but other issues as well (we're working on agenda). Presume 18th is better so we'll plan on that.

We have everyone who participates at PCI including port, city, state etc. If you wanted to...or wanted us to...to send out notice to the other PRP's who never show, I'm sure we could do that for the part of the meeting you guys are at. Let me check. That said, I think we want folks to be able to have a good, frank conversation, so we don't want it to be a "public" meeting with press etc.

Subject: FW: Follow up meeting with PCI (sf)
How does this fit in with any discussion you have had with Sheryl as to the next meeting? Note this
comes from Sean (at Sheryl's request) and the opening for other PCI members to participate - specifically
mentioning public entities.

Subject: FW: Follow up meeting with PCI (sf)
See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a
 follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times
during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a
venue large enough to hold enough people. They variously described their intended audience as all PH
PRPs, the PCI Group members, and at one point (I believé) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience.

Subject: [EXTERNAL] Follow up meeting with PCI (sf) Hello Howard,

Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last week. Would the date of October 18 or 30th work for you all? On a related note, could other PCI members participate in case they have the same/similar questions, e.g. public entities?

Thank you.

Subject: Finalized RD FAQs

Attachments: PH_Remedial-Design_FAQ_References_Final.pdf

Flag: Follow up

Hi Rich

Here are the FAQs for discussion next week

| EPA Response on and Flexibility | ROD Excerpts and ROD Responsiveness Summary Reference(s) |
|---|--|
| The ROD decision tree (ROD Appendix I, Figure 28) supersedes the FS decision trees. | ROD Sections 11 and 14, pages 85-87 and 103: A revised decision tree has been developed for the Selected Remedy that provides more clarity in how design data will influence design and construction (Figure 28 in Appendix I). |
| | ROD Section 14.2, pages 105-106: The final technology assignment will be identified in the remedial design, after collection of additional sampling data in all areas and segments of the river. The technology assignment will be identified as indicated in the decision tree in Figure 28 in Appendix I. |
| Capping and/or dredging will be used in areas that exceed the RALs for the focused COCs or PTW thresholds (Appendix II, Table 21). The flexibilities related to capping and dredging design requirements are described in ROD Section 14.2.9. Site-specific conditions, such as but not limited to, navigation and land use information, whether structures are present, and what type of slope exists or may result from cleanup will inform technology selection and remedial design in the SMAs. | ROD Section 11, pages 85-87: In response to comments on the Proposed Plan, EPA has revised, simplified, and clarified the decision tree (Figure 28 in Appendix I) to show how design data will be incorporated into remedial design decisions. In addition, the decision tree is accompanied by specific design requirements, presented in Section 14.2.9. ROD Section 14.2, pages 105-106: The final technology assignment will be identified in the remedial design, after collection of additional sampling data in all areas and segments of the river. The technology assignment will be identified as indicated in the decision tree in Figure 28, Appendix 1 In addition, reasonably anticipated future navigation and land use information and other data will be collected at a much greater level of detail than information collected as part of the RI to support the Remedial Design When applying the decision tree logic with newly gathered information, the design and constructed remedy will reflect the newer information After identifying appropriate cap or dredge technologies through this process, further modifications may be necessary during design to ensure the final constructed remedy is appropriate for actual Site conditions. |
| | <u>ROD RS:</u> Sections 2.8.4, 2.21.2, 3.1.53, and 4.1.7 |
| As specified in the ROD and ROD decision tree (Appendix I, Figure 28), capping and/or dredging will occur in SMAs, which are areas exceeding the RALs for the focused COCs or the PTW thresholds (Appendix II, Table 21) as determined through updated sampling and analysis. ENR will occur in areas of Swan Island Lagoon not addressed by dredging or capping, unless those areas have recovered naturally. MNR will be used to achieve the final cleanup levels outside of actively remediated areas. | ROD Section 14.2, pages 104-105: Areas to be capped or dredged will be defined by RALs for the Selected Remedy (Table 21, in Appendix II). RALs are contaminant-specific sediment concentrations of focused COCs used to define areas of more active cleanup and will reduce contaminant concentrations and risks more effectively than ENR or MNR from current Site-wide average concentrations. |
| An ESD would not be necessary because the ROD anticipated that the horizontal and vertical extent of the SMAs (defined by RAL and PTW exceedances) would be refined based on data collected during RD. | ROD Section 14.2.7, Baseline and Remedial Design Data Collection, page 111: Significant remedial design sampling to determine existing baseline levels of contamination and to design the cleanup will be conducted before construction begins. Baseline sampling will be done to identify existing conditions as the Site and will include a statistically valid data set for sediment, river banks, surface water, groundwater, pore water, and fish tissue samples. This will include a statistically valid number of samples and use of the 95% UCL for both surface and subsurface sediment concentrations in and near where contamination was identified in the RI/FS to determine SWAC(s) and for the purposes of applying the decision tree, as well as in proceeding with the design of active remediation throughout the Site. Data will be collected consistent with EPA-approved RI/FS decision rules on data collection (e.g., treatment of a non-detect value) and will be evaluated on spatial and temporal scales appropriate for the RAOs. |
| The 2018 Pre-RD Group PDI and Baseline Sampling data will provide an updated estimate of how many | ROD Section 14.2.7, <i>Long-Term Monitoring</i> , page 112: Data on contaminant levels will be used for multiple purposes, to determine if natural recovery is |
| of the 1,774 acres designated for natural recovery are below ROD cleanup levels (Appendix II, Table 17). Future long-term monitoring will be used to monitor the progress of the remedy toward achieving the | occurring as expected or if any additional actions are required to achieve the cleanup goals within the planned timeline. ROD RS: Sections 2.2.4, 2.10.1, 2.16.1 and 3.2.43 |
| RAOs established in the ROD. | <u>KOD KU.</u> 0000018 2.2.1, 2.10.1, 2.10.1 that 3.2.13 |
| Remedy sequencing will consider the potential for recontamination of remediated areas by upstream contamination or remedial activities. Areas most prone to potential recontamination are those with the highest degree of proximity and connectedness to un-remediated areas or remedial actions. For example, contaminant migration is more likely to affect neighboring downstream areas and less likely to affect areas across the river channel or of significant distance away. Generally, when areas are in close, direct communication, sequencing will be done in an upstream to downstream manner and/or prioritizing areas with the heaviest contamination. However, concurrent Site-wide RD will not be substantially affected by concerns regarding the migration and redeposition of contaminated sediments as many SMAs are significant distances from | ROD Section 14.2.11, page 116: Due to the size of the Site and the breadth of contamination, implementation of the Selected Remedy may need to be conducted in phases and/or work sequenced. To implement the remedy, EPA will consider, at a minimum, source control actions, recontamination potential, scope (size) of the actions across the Site, impacts to the river users and the community, seasonal weather impacts, fish windows, and implementation approaches the parties that agree to perform the cleanup may suggest. Sequencing of cleanup may consider factors such as potential impacts of upstream work on downstream areas, including but not limited to, the potential for resuspension of contaminants during construction, nature and extent of contamination, and integration of the cleanup actions into the overall Site remedy. |
| | The ROD decision tree (ROD Appendix I, Figure 28) supersedes the FS decision trees. Capping and/or dredging will be used in areas that exceed the RALs for the focused COCs or PTW thresholds (Appendix II, Table 21). The flexibilities related to capping and dredging design requirements are described in ROD Section 14.2.9. Site-specific conditions, such as but not limited to, navigation and land use information, whether structures are present, and what type of slope exists or may result from cleamup will inform technology selection and remedial design in the SMAs. As specified in the ROD and ROD decision tree (Appendix I, Figure 28), capping and/or dredging will occur in SMAs, which are areas exceeding the RALs for the focused COCs or the PTW thresholds (Appendix II, Table 21) as determined through updated sampling and analysis. ENR will occur in areas of Swan Island Lagoon not addressed by dredging or capping, unless those areas have recovered naturally. MNR will be used to achieve the final cleanup levels outside of actively remediated areas. An ESD would not be necessary because the ROD anticipated that the horizontal and vertical extent of the SMAs (defined by RAL and PTW exceedances) would be refined based on data collected during RD. The 2018 Pre-RD Group PDI and Baseline Sampling data will provide an updated estimate of how many of the 1,774 acres designated for natural recovery are below ROD cleanup levels (Appendix II, Table 17). Future progress or the removing will be used to monitor the ROD cleanup fevels (Appendix II, Table 17). Future progress or the removing will be used to monitor the ROD established in the ROD. Design Remedy sequencing will consider the potential for recontamination or remediate areas by upstream contamination or remediate areas or feed and sea for the potential for recontamination of remediated areas or remediated areas or remediated areas or |

| Question Will areas of the Site exceeding RALs be able to delay RD until more contaminated upstream | EPA Response EPA believes it is important for all areas to initiate the RD process and begin collecting the higher-density, site-specific remedial design data. While it is recognized that | ROD Excerpts and ROD Responsiveness Summary Reference(s) See above response with excerpted text from ROD Section 14.2.11, page 116. |
|---|---|---|
| areas are successfully remediated? | the dynamic character of the Willamette River may change surface sediment contaminant concentrations over time, it is less likely that the contamination at depth will change substantially. The completion of concurrent Site-wide RD will allow for effective sequencing of cap and dredge construction to minimize recontamination of these constructed areas. | |
| Will areas of the Site exceeding RALs be able to perform data gaps sampling to assess MNR without completing the full RD process? | As specified in the ROD and ROD decision tree (Appendix I, Figure 28), capping and/or dredging will occur in all areas exceeding RALs or PTW thresholds (Appendix II, Table 21). Generally, EPA expects these areas within the Site will need to undergo the full RD process. Natural recovery of surface sediment COCs will be monitored in the future by replicating the 2018 non-biased sediment sampling program. | ROD Section 14.2, pages 104-105: Areas to be capped or dredged will be defined by RALs for the Selected Remedy (Table 21, in Appendix II). RALs are contaminant-specific sediment concentrations of focused COCs used to define areas for more active cleanup and will reduce contaminant concentrations and risks more effectively than ENR or MNR from current Site-wide average concentrations. |
| Remedial Design Investigations Will the 2018 Pre-RD Group PDI and Baseline Sampling data be considered during RD? | Yes, the 2018 Pre-RD Group PDI and Baseline Sampling data will be considered in RD and should be used to inform additional site-specific data collection needs during the full RD process. | ROD Section 14.2.7, Baseline and Remedial Design Data Collection, page 111: Significant remedial design sampling to determine existing baseline levels of contamination and to design the cleanup will be conducted before construction begins. Baseline sampling will be done to identify existing conditions as the Site and will include a statistically valid data set for sediment, river banks, surface water, groundwater, pore water, and fish tissue samples. This will include a statistically valid number of samples and use of the 95% UCL for both surface and subsurface sediment concentrations in and near where contamination was identified in the RI/FS to determine SWAC(s) and for the purposes of applying the decision tree, as well as in proceeding with the design of active remediation throughout the Site. Data will be collected consistent with EPA-approved RI/FS decision rules on data collection (e.g., treatment of a non-detect value) and will be evaluated on spatial and temporal scales appropriate for the RAOs. |
| Will additional characterization be needed beyond the 2018 Pre-RD Group sampling? | Data needs in any given area are a site-specific determination. For example, areas may need higher resolution sampling of the horizontal and vertical extent of contamination, and additional information on current and anticipated future land/waterway use, structures, habitat, and flood storage. | See above response with excerpted text from ROD Section 14.2.7, Baseline and Remedial Design Data Collection, page 111. |
| How will RD incorporate the source control status of an adjacent upland property? | EPA is working with Oregon DEQ to ensure that issues with source control are addressed prior to and during the RD process. During design, EPA will require a source control sufficiency assessment to evaluate whether potential sources of recontamination have been adequately investigated and controlled or considered such that the remedial action can proceed. The sufficiency assessment will include an upland evaluation of pathways to the river through direct discharges, groundwater, river bank, and overwater to ensure that upland sources have been controlled. The assessment will also evaluate potential in-water sources of recontamination including the resuspension of bedded sediments. | ROD Section 9, page 55: It is EPA's expectations that DEQ's actions to address upland source control will adequately address contaminated soils, surface water, and especially groundwater contamination migrating to the river consistent with CERCLA. Response actions will address contamination within the in-river portion of the Site and associated river banks. There are known sources of contamination in the upland areas and known sources in locations in the downtown reach of the river (approximately RM 12 to RM 16.6). EPA is relying on the Oregon DEQ to use its authorities to address these sources. It is expected that controlling these sources will reduce or eliminate contamination in soil, groundwater, storm water, and surface water that migrates to the Willamette River. |
| Horizontal and Vertical Delineation | on of SMAs During Remedial Design | |
| The first decision box on Figure 28: Technology Application Decision Tree requires a determination of whether one is "Within SMA (See Note 1)". Note 1 states "Contamination is defined in three dimensions." In this context, what does it mean that contamination is defined in three dimensions? | The extent of sediment concentrations exceeding RALs for the ROD focused COCs must be defined laterally and vertically throughout the area of contamination. This three-dimensional information is used to define the extent of the SMAs and for application of the decision tree to guide the assignment of capping and dredging technologies. Data gaps on the lateral and vertical extent of contamination will be addressed during site-specific design investigations. | See above response with excerpted text from ROD Section 14.2.7, Baseline and Remedial Design Data Collection, page 111. |
| How will the vertical extent of contamination be determined? | The vertical extent of contamination will be determined by collecting subsurface sediment cores and sampling them in 1-foot intervals. Previously collected data and the conceptual site model will be used to determine the depth of sediment cores required. The 1-foot intervals will allow for finer resolution of the contamination that is present, which will reduce the uncertainty of the vertical extent of COCs above RALs, improving technology selection and design. | ROD Section 14.2.9.2, page 114: Dredging designs will consider the lateral and vertical extent of contamination. The lateral extent of contamination will be based on the SMAs (RALs and PTW; see Section 14.2.7, Monitoring Requirements). The vertical extent of contamination will be based on the decision tree in Figure 28 in Appendix I. |
| If surface sediment concentrations are below RALs, but there are RAL exceedances at depth, is one within an SMA or not? | Whether an area is within an SMA is dependent on the depth of RAL exceedances. Site-specific conditions based on data collected during RD will be considered to refine dredging and cap design. For a protective cleanup, this determination must consider the long-term potential for exposure to subsurface | See above response with excerpted text from ROD Section 14.2.7, <i>Baseline and Remedial Design Data Collection</i> , page 111. ROD RS: Sections 2.1.2, 2.13.2, 3.1.68 and 4.1.13 |
| Is there a minimum depth of sediment with concentrations below RALs which would make | sediment contamination. Site-specific information developed during RD will be required to determine whether it is reasonable to anticipate that contamination at depth will not be | ROD Section 14.2.9.2, page 114: Dredging designs will consider the lateral and vertical extent of contamination. The lateral extent of contamination will be based on the SMAs (RALs and PTW; see Section 14.2.7, Monitoring |

| Question exceedances at depth irrelevant? For example, if there are two feet | EPA Response exposed in the future and therefore, can be left in place. | ROD Excerpts and ROD Responsiveness Summary Reference(s) Requirements). The vertical extent of contamination will be based on the decision tree in Figure 28 in Appendix I. |
|--|--|--|
| of clean sediment over sediment exceeding RALs, is dredging still prescribed? Five feet? | | |
| Remedial Design Issues Dredging may generate slope failure. Do the design requirements in Section 14.2.9 allow for consideration of the slope of the sediment bed in dredging design? | Slope stability analyses will need to be performed to address these site-specific conditions. | ROD Section 14.2.9.1, page 114: Cap design will consider the slope of the sediment bed. Sediment caps will be designed to remain in place. This may require removal of material [i.e., dredging] to lessen the slope angle or incorporation of buttresses at the base of the slope to maintain stability and promote establishing habitats. ROD RS: Sections 2.21.3, 3.1.53, and 3.1.71 |
| Do the design requirements in | As specified in the ROD and ROD decision tree | ROD Section 14.2, Post-ROD Data Gathering and Other Information |
| Section 14.2.9 allow for consideration of whether an area is depositional in assigning an appropriate technology? Will deposition be considered in RD? | (Appendix I, Figure 28), capping and/or dredging will occur in all areas exceeding RALs or PTW thresholds (Appendix II, Table 21). However, sediment deposition as well as but not limited to impacts from propwash scour, extreme flood events, and wind- and vessel-generated waves will be considered during RD. These data will inform cap design and future cap monitoring. | <u>Verification</u> , page 106: For purposes of the FS, several assumptions were made about what the Selected Remedy would look like in the river after applying the decision tree based on existing data. Post-ROD sampling will be conducted to support remedial design and to refine the CSM. This updated information will be used for design/construction. Post-ROD sampling will include, in addition to other relevant data, surface and subsurface sediment contaminant concentrations, surface water, sediment pore water and groundwater data, bathymetry, flood-rise modeling, fish/shellfish tissue, and NAPL delineation. |
| Do the design requirements in Section 14.2.9 allow for consideration of the presence of rock/cobble/bedrock in assigning an appropriate technology? Will the presence of hard substrate bottoms be considered in RD? | Physical characteristics of the sediment bed, including the presence of rock/cobble/bedrock, will be considered in technology selection and RD. | See above response with excerpted text from ROD Section 14.2, Post-ROD Data Gathering and Other Information Verification, page 106. |
| Do the design requirements in Section 14.2.9 allow for consideration of the impact of dredging on habitat areas? | As stated in ROD Section 14.2.9.1, additional requirements may be determined during RD and in coordination with NMFS and USFWS to comply with ARARs. | ROD Section 14.2.9.1, page 113: In habitat areas, currently defined by NMFS as those areas above -15 feet CRD, post-remedy surfaces will be maintained at their current depth and backfilled or capped with suitable habitat materials. |
| | | ROD Section 14.2.9.2, General Dredging, Residuals Management, page 114: In the shallow region, residual management will consist of capping or backfilling to grade to prevent exposure above cleanup levels and to minimize adverse effects on in-river and riparian habitat, including the loss of shallow water habitat. |
| | | ROD Section 14.2.9.2, <i>Water Quality Controls</i> , page 115: Water quality controls, including silt curtains and/or rigid containment (e.g., sheet pile wall enclosures) may be required to minimize releases to the water column associated with the presence of contaminated sediments, NAPL, debris, and other chemical or physical conditions to comply with water quality standards. Additional requirements may be determined during remedial design and in coordination with NMFS and USFWS to comply with ARARs. |
| | | ROD Section 15.2.3, page 129: The Selected Remedy will be designed to avoid or minimize adverse impacts to aquatic resources and waters of the United States. |
| | | ROD RS: Sections 2.8 (and subsections) and 2.13.1 provide clarifications on habitat questions. |
| The definition of structures in Figure 28 does not appear to be very flexible and is not particularly consistent with dock ownership and uses at various properties. How are such site-specific uses to be addressed given the ROD Figure 28 decision tree's lack of recognition of such issues? | Additional factors regarding site structures may be considered in the RD information, as appropriate. Current and future land uses, ownership, flood storage/rise, habitat creation, and the vertical extent of contamination all need to be considered in the RD. | ROD Figure 28 and Section 14.2, Post-ROD Data Gathering and Other Information Verification, page 106: In addition, reasonably anticipated future navigation and land use information and other data will be collected at a much greater level of detail than information collected as part of the RI to support the Remedial Design. As part of the FS, observed current uses were assumed to continue in the river. During the public comment period, some parties identified that the potential future use(s) of a part of the river may be other than current uses or EPA's assumptions. To ensure that the correct reasonably anticipated future uses are used for the remedial design, these assumptions will be verified and will be altered, as appropriate. For example, eliminating the need for a more expensive dredge and armored cap remedy if a significant area will no longer to be used for marine terminal purposes. |
| Capping without Dredging Under what scenario would capping without pre-dredging be allowed in the intermediate depth region? | Current and future land uses, flood storage/rise, habitat creation, slope stability, and the vertical extent of contamination all need to be considered to determine whether capping without pre-dredging will be allowed in the intermediate depth region. | ROD Section 14.2, Post-ROD Data Gathering and Other Information Verification, page 106: During the public comment period, some parties identified that the potential future use(s) of a part of the river may be other than current uses or EPA's assumptions. To ensure that the correct reasonably anticipated future uses are used for the remedial design, these assumptions will be altered, as appropriate. For example, eliminating the need for a more expensive dredge and armored cap remedy if a significant area will no longer be used for marine terminal purposes. |
| | | ROD Section 14.2.9.1, Flood Rise and Navigation, page 114: Caps will be designed to avoid adverse impacts to the floodway, consistent with the Executive Orders for Floodplain Management (Executive Orders 11988 and 13690) and FEMA regulations. Additionally, caps will be designed to avoid adverse impacts to current and future navigation based on expected cap thickness, authorized channel depth, and appropriate buffer. This may limit cap construction in some locations or require removal of contaminated sediment prior to cap placement. |

| Question ROD Section 14.2.3 states that, "the elevation of the top of the cap or residual layer will be no higher than the pre-design elevation" which appears to preclude the option of increasing the valuable shallow water habitat as part of remedial action. Is that EPA's intent? | It is not EPA's intent to limit shallow water habitat; however, avoiding or minimizing impacts to the floodway need to be considered in conjunction with habitat creation. Furthermore, site-specific cap designs will require review by NMFS, USFWS, and others and may be modified to improve aquatic habitat. | ROD Excerpts and ROD Responsiveness Summary Reference(s) ROD Section 14.2.3, page 108: Under any scenario, the elevation of the top of the cap or residual layer will be no higher than the pre-design elevation to avoid loss of submerged aquatic habitat, preserve slope stability, and negate adverse impacts to the floodway. If appropriate to protect sensitive species, a habitat layer will be incorporated into the constructed remedy. ROD RS: Sections 2.8 (and subsections) and 2.13.1 for clarifications on habitat questions. |
|--|---|--|
| Alternative/Other Remedial Te Why are alternative/other remedial technologies, such as in-situ treatment and ENR, not included for potential use within SMAs on the Technology Application Decision Tree (Figure 28)? | Capping and dredging were determined during the FS to achieve the greatest and most permanent risk reductions for the most contaminated sediments, which are in SMAs. Therefore, the use of alternative remedial technologies can only be applied in areas below RALs and PTW thresholds. | ROD Section 14.1, page 103: The Selected Remedy is protective of human health, complies with ARARs, and provides the best balance of tradeoffs among the balancing criteria, including addressing many of the Tribal community's concerns as well as community concerns raised through public comments. It reduces risk within a reasonable time frame, is practicable, provides for long-term reliability of the remedy, and minimizes reliance on institutional controls. It will achieve substantial risk reduction by dredging and capping areas with the most contaminated sediments, reduce remaining risks to the extent practicable through ENR and MNR, and manage remaining risks to human health through institutional controls. |
| If supported by available data, will EPA accept alternate technologies specified in the ROD design requirements for areas exceeding RALs but below PTW thresholds? If there is a lot of deposition, can one make the demonstration that partial dredge and cap, ENR, or MNR is appropriate for an area exceeding RALs – would this | As specified in the ROD and ROD decision tree (Appendix I, Figure 28), capping and/or dredging will occur in all areas exceeding RALs or PTW thresholds (Appendix II, Table 21). However, alternate technologies such as in-situ treatment and ENR may be considered for use in areas below RALs on a site-specific basis. | ROD Section 14.2, pages 104-105: Areas to be capped or dredged will be defined by RALs for the Selected Remedy (Table 21, in Appendix II). RALs are contaminant-specific sediment concentrations of focused COCs used to define areas of more active cleanup and will reduce contaminant concentrations and risks more effectively than ENR or MNR from current Site-wide average concentrations. ROD RS: Sections 3.1.3, 3.1.33, 3.1.66, 3.1.67, 3.2.2, 3.2.5, 3.5.2 for clarifications on ENR and MNR application. |
| River Banks How is the top of bank defined (elevation, abrupt change in slope angle, other)? | Defining the top of the bank is site-specific and is visually determined based on the angle of the slope towards the river. Additional guidance will be provided in a river bank guidance document that EPA is developing. | ROD Section 14.2.5, page 109: River banks are defined as areas from top of bank down to the river that may be contaminated along the shoreline next to contaminated in-river shallow areas. Remediation of contaminated river banks is included in the Selected Remedy where it is determined that it should be conducted in conjunction with the in-river actions and to protect the remedy (Figure 9 in Appendix I and Table 21 in Appendix II). Other river banks may be included in the remedial action if contamination contiguous with contaminated river sediment is found during remedial design sampling. ROD Section 14.2.9.5, page 116: In an SMA, contaminated river banks will be remediated through this cleanup where they are contiguous with in-river contamination or where they pose a risk of recontamination to the Selected Remedy. ROD: Sections 14.4, 15.1.3, 15.2.3 detail additional river bank requirements for the Selected Remedy. ROD RS: Sections 2.26.2, 3.1.15, and 4.2.10 |
| Does the ROD allow flexibility for river bank capping with materials other than vegetation with beach mix? | Selection of river bank cap materials will be based on site-specific considerations addressed under design. River bank source control and containment to meet the RAOs will be considered on a site-specific basis during RD. | ROD Section 14.2.5, page 109: Engineered caps or vegetation with beach mix will be placed as the final cover based on area-specific designs, which will account for appropriate slope according to the programmatic or site-specific Biological Opinion, as appropriate. See above response with excerpted text from the following: ROD Section 14.2.7, Baseline and Remedial Design Data Collection, page 111 ROD Sections 14.4, 15.1.3, 15.2.3 detail additional river bank requirements for the Selected Remedy. |
| Does the ROD allow for flexibility to consider the net benefit to overall habitat and function resulting from combined river bank remediation and shallow region in-water remediation? For example, would EPA consider relaxing the shallow region requirement that "the elevation of the top of the cap or residual layer will be no higher than the pre-design elevation" if concurrent river bank remediation would result in a | The question is hypothetical and needs to be supported by site-specific design data. Habitat elements of the design will be determined in coordination with NMFS, USFWS, and others. Based on site-specific factors, it may not be possible to obtain the optimal river bank. However, it might be possible to fill in some areas without affecting the floodway. Primary concerns include not affecting or mitigating impacts to the floodway due to habitat creation. | ROD RS: Sections 2.26.2, 3.1.15 and 4.2.10 ROD Section 14.2.9.5, page 116: In an SMA, contaminated river banks will be remediated through this cleanup where they are contiguous with in-river contamination or where they pose a risk of recontamination to the Selected Remedy. These cleanups will be conducted in a manner that is compatible with the Selected Remedy and minimizes adverse impacts to riparian habitat including minimizing slope angle and the use of hardened banks to prevent erosion. ROD: Section 14.4, page 118: Implementation of the Selected Remedy will result in improvements in the overall river habitat, with positive impacts on all species that use the river, including freshwater rearing sites and migration corridors that are essential to the conservation of the listed salmonid species and species that have a role in Tribal lifestyles. ROD: Section 15.2.3, page 128: In addition, avoidances and minimization |
| net benefit to habitat? | | measures would be implemented on Site to restore substrate, slope, and natural cover to the extent possible to maintain habitats and functions that would be altered during implementation. Compensatory mitigation would be required to replace lost habitats and functions such that there would be "no net loss" of aquatic resource functions. |

| Question | EPA Response | ROD Excerpts and ROD Responsiveness Summary Reference(s) |
|--|---|---|
| Is river bank remediation required throughout all river bank areas shown on Figure 9? | The need for river bank remediation will depend on design sampling data and site-specific conditions (e.g., nature of the bank, land and waterway use, etc.). Additional guidance will be provided in a river bank guidance document that EPA is developing. | ROD RS: Sections 2.26.2, 3.1.15 and 4.2.10 ROD Section 14.2, Post-ROD Data Gathering and Other Information Verification, page 106: Post-ROD sampling will be conducted to support remedial design and to refine the CSM. This updated information will be used for design/construction. Post-ROD sampling will include, in addition to other relevant data, surface and subsurface sediment contaminant concentrations, surface water, sediment pore water and groundwater data, bathymetry, floodrise modeling, fish/shellfish tissue, and NAPL delineation. See above response with excerpted text from the following: ROD Section 14.2.7, Baseline and Remedial Design Data Collection, page 111 ROD Sections 14.4, 15.1.3, 15.2.3 detail additional river bank requirements for the Selected Remedy. |
| Would river bank remediation be required if source control measures such as erosion and storm water control are in place? | This is a hypothetical question that depends on what is developed and presented in the design package for a specific area. The status of source control measures to address bank erosion and stormwater discharges relative to the RAOs will be considered during design. During design, EPA will require a source control sufficiency assessment to evaluate whether potential sources of recontamination have been adequately investigated and controlled or considered such that the remedial action can proceed. | ROD RS: Sections 2.26.2, 3.1.15 and 4.2.10 See above response with excerpted text from the following: ROD Section 14.2.7, Baseline and Remedial Design Data Collection, page 111 ROD Section 14.2.9.5, page 116 ROD: Sections 14.4, 15.1.3, 15.2.3 detail additional river bank requirements for the Selected Remedy. ROD RS: Sections 2.26.2, 3.1.15 and 4.2.10. |
| Can additional sampling and analysis (e.g., chemical testing, slope stability, etc.) be performed to modify the areas targeted for river bank remediation on ROD Figure 9? | Additional sampling and analysis are a component of design and would provide information as part of an overall design package that could possibly modify the area targeted for remediation on ROD Figure 9. Additional guidance will be provided in a river bank guidance document that EPA is developing. | ROD Section 14.2.7, Baseline and Remedial Design Data Collection, page 111 ROD Section 14.2.9.5, page 116 ROD: Sections 14.4, 15.1.3, 15.2.3 detail additional river bank requirements for the Selected Remedy. ROD RS: Sections 2.26.2, 3.1.15 and 4.2.10. |
| Remedial Design Administrative | Structure | <u>NOD 10.</u> DOCHOLD 2.20.2, 3.1.13 dist 7.2.10. |
| Is RD directly coupled with RA through a consent agreement with EPA? | Under the Superfund statute, when parties perform RA it must be done under a judicial consent decree or unilateral administrative order. RD can be done under one of these mechanisms also or under an administrative settlement and order on consent. Generally, EPA likes to combine RD and RA under a consent decree. | Information on this topic is not covered in the ROD or ROD RS. |
| What is the agreement/consent structure that EPA is seeking to perform RD? | EPA has agreed to postpone issuance of Special Notice Letters to initiate Consent Decree negotiations until December 2019 to allow for completion of the allocation process. However, in the interim, EPA is looking for RD to move forward Site-wide through administrative settlements. Currently, RD is occurring under administrative settlements and orders on consent at the GASCO, River Mile 11E, and Port of Portland Terminal 4 Project Areas. EPA would like to be moving RD forward on all the SMA areas. | Information on this topic is not covered in the ROD or ROD RS. |

Subject: October 18 Meeting Agenda

Davis,

I have reviewed your email from this morning to Peter Saba and Rich Gold. We are disappointed with the deletions you have made from the discussion topics on the agenda. If EPA wants the PRP Group at this Superfund Site to move forward with its process to facilitate earlier rather than later implementation of remedy, then these subjects should not be dropped. In addition, we think detailed discussions with the potentially responsible parties, prior to EPA decisions being made on these matters, is needed.

Jeff

Subject: Oct. 18 Meeting Agenda and Attendees

Hi Peter,

I am resending the list of participants. Attached please find EPA's suggestions to the agenda topics. I have included the new location and call-in information as part of the revision.

Below are the participants from our end:

In Person Participants:

Sheryl Bilbrey
Cami Grandinetti
Davis Zhen
Sean Sheldrake
Eva DeMaria
Hunter Young
Dean Ingemansen
Lori Cora

Via Phone Stephanie Ebright Stephanie Mairs Karl Gustavson Scott Coffey & CDM staff (for technical discussions only)

Thanks,

Davis Zhen, Manager Site Cleanup Unit 2 Office of Environmental Cleanup 1200 Sixth Avenue Suite 155 M/S ECL – 122, Seattle, WA 98101

Subject: RE: Oct. 18 Meeting Agenda and Attendees

Davis & Sheryl,

I am working on finalizing our meeting logistics for Thursday, October 18.

Ken Tyrrell, Project Coordinator – Portland Harbor, from AECOM will join in person for the Pre-RD Work discussion (focused on unvalidated data request) scheduled for the last part of the meeting, tentatively Noon to 1 PM.

The senior chemist (Karen Mixon) and data management expert (Mike Surowiec) will join for that part of the meeting by phone.

To ensure that we have sufficient room in the conference room please advise the anticipated EPA attendees. I will circulate a dial-in once we have reconfirmed the location.

Thanks, Peter

Subject: Oct. 18 Meeting Agenda and Attendees

ENFORCEMENT CONFIDENTIAL

Sheryl & Davis,

As requested attached is a proposed agenda for the meeting on October 18.

Please note that a draft of the agenda was circulated and discussed with a subcommittee of representatives of the PCI Private Business Group and that this draft is being shared with the PCI Private Business Group.

The PCI Private Business Group is a group of businesses in and around the Portland Harbor Superfund Site which span a range of industries across different sectors of the economy. The PCI Private Business Group does not include the City of Portland, State of Oregon or the United States. The statements made and views contained in the attached document are those of the PCI Private Business Group, and no statement or view expressed in the attached document is made on behalf of the identified public entities.

Set forth below is a list of the attendees. We are not anticipating having anyone participate by phone, but can set up a dial-in if EPA needs one.

As previously discussed with Sheryl, we are planning to set aside the last part of the meeting (we would suggest the last hour) for a discussion just involving Pre-RD AOC Group Participants and EPA on Pre-RD Work matters, particularly the EPA request for all unvalidated data and how best to meet EPA's data needs while minimizing some of the concerns we have. At the end of the day, we share a common objective here which is the collection and reporting of accurate and reliable data regarding current conditions at the Site to inform the remediation, which data is accepted by EPA, the PRPs and the larger community. We anticipate Ken Tyrrell and one or two of his team that are involved in the data management effort to join us for that portion of the meeting. Once I have confirmed with Ken who will be attending, we will provide that info as well.

Please let me know if you have any questions on the agenda or the meeting logistics.

Best,

Peter

Attendees

Linda Baker

Clark Davis

Loren Dunn

Rich Gold

Dimitri Karakitsos

Mat Cusma

Melissa Kleven

Jeff Ring

Scott Rowlands

> Subject: Portland Harbor PCI group Co-chairmen of Steering Committee
 > Hello, Loren. I trust you are well and enjoying your new law firm. I'm writing to confirm the names
 of the co-chairs of the PCI Group steering committee. From previous meetings, I understood that you and
 Jeff Ring are co-chairs. Is that still the case?
                                                                                                                                                                                                 I'm asking because EPA wants to send correspondence
 to the co-chairs soon.
                                                                                             Thanks.

 > My bad.
                                         Yes the group from July to talk tech followup but other issues as well (we're working on
 agenda).
                                         Presume 18th is better so we'll plan on that.
> We have everyone who participates at PCI including port, city, state etc. If you wanted to...or wanted us to...to send out notice to the other PRP's who never show, I'm sure we could do that for the part of the meeting you guys are at. Let me check. That said, I think we want folks to be able to have a good, frank conversation, so we don't want it to be a "public" meeting with press etc.

> Subject: FW: Follow up meeting with PCI (sf)
> How does this fit in with any discussion you have had with Sheryl as to the next meeting? Note this
 comes from Sean (at Sheryl's request) and the opening for other PCI members to participate - specifically
mentioning public entities.

          See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a
  follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times
during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They variously described their intended audience as all PH PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience.

> Subject: [EXTERNAL] Follow up meeting with PCI (sf)
> Hello Howard,
> Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last
week. Would the date of October 18 or 30th work for you all? On a related note, could other PCI members
participate in case they have the same/similar questions, e.g. public entities?
> Thank you.

> Subject: Portland Harbor PCI group Co-chairmen of Steering Committee
> Hello, Loren. I trust you are well and enjoying your new law firm. I'm writing to confirm the names
of the co-chairs of the PCI Group steering committee. From previous meetings, I understood that you and
Jeff Ring are co-chairs. Is that still the case?
                                                                                                                                                                                                                                     I'm asking because EPA wants to send correspondence
to the co-chairs soon.
                                                                                                              Thanks.

 agenda).
                                                  Presume 18th is better so we'll plan on that.
> We have everyone who participates at PCI including port, city, state etc. If you wanted to...or wanted us to...to send out notice to the other PRP's who never show, I'm sure we could do that for the part of
 the meeting you guys are at. Let me check. That said, I think we want folks to be able to have a good, frank conversation, so we don't want it to be a "public" meeting with press etc.

> Subject: Fwd: Follow up meeting with PCI (sf)
> Is this the group mtg you and II were discussing which was the same group we had in July or is this
another tech mtg? Just confused.
       We proposed a mtg on 18th to 19 of Oct with the group from July, not just tech.

> Subject: FW: Follow up meeting with PCI (sf)
> How does this fit in with any discussion you have had with Sheryl as to the next meeting? Note this
comes from Sean (at Sheryl's request) and the opening for other PCI members to participate - specifically
mentioning public entities.

> Subject: FW: Follow up meeting with PCI (sf)
> See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a
 follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times
during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a
venue large enough to hold enough people. They variously described their intended audience as all PH
```

```
they're focusing on the Pre-RD Group members unless we want to broaden the audience.

> Subject: [EXTERNAL] Follow up meeting with PCI (sf)
> Hello Howard,
> Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last
            Would the date of October 18 or 30th work for you all? On a related note, could other PCI members
participate in case they have the same/similar questions, e.g. public entities?
> Thank you.

 > Subject: Re: Follow up meeting with PCI (sf)
> My bad. Yes the group from July to talk tech followup but other issues as well (we're working on
 agenda).
                                           Presume 18th is better so we'll plan on that.
> We have everyone who participates at PCI including port, city, state etc. If you wanted to...or wanted us to...to send out notice to the other PRP's who never show, I'm sure we could do that for the part of the meeting you guys are at. Let me check. That said, I think we want folks to be able to have a good, frank conversation, so we don't want it to be a "public" meeting with press etc.

> Subject: FW: Follow up meeting with PCI (sf)
> How does this fit in with any discussion you have had with Sheryl as to the next meeting? Note this
comes from Sean (at Sheryl's request) and the opening for other PCI members to participate - specifically
mentioning public entities.

> Subject: FW: Follow up meeting with PCI (sf)
        See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a
follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times
during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a
venue large enough to hold enough people. They variously described their intended audience as all PH PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like
they're focusing on the Pre-RD Group members unless we want to broaden the audience.

> Subject: [EXTERNAL] Follow up meeting with PCI (sf)
> Hello Howard.
> Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last
                             Would the date of October 18 or 30th work for you all? On a related note, could other PCI members
participate in case they have the same/similar questions, e.g. public entities?
        Thank you.

 > Subject: Re: Follow up meeting with PCI (sf)
> My bad. Yes the group from July to talk tech followup but other issues as well (we're working on
 agenda).
                                                   Presume 18th is better so we'll plan on that.
> We have everyone who participates at PCI including port, city, state etc. If you wanted to...or wanted us to...to send out notice to the other PRP's who never show, I'm sure we could do that for the part of the meeting you guys are at. Let me check. That said, I think we want folks to be able to have a good, frank conversation, so we don't want it to be a "public" meeting with press etc.

    See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a
follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They variously described their intended audience as all PH
PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like
they're focusing on the Pre-RD Group members unless we want to broaden the audience.

We're sending PCI chairs a letter outlining expectations for December 5th meeting. May be a formality but
we need documentation

 > Subject: Re: Follow up meeting with PCI (sf)
                                                   Yes the group from July to talk tech followup but other issues as well (we're working on
 agenda).
                                                    Presume 18th is better so we'll plan on that.
> We have everyone who participates at PCI including port, city, state etc. If you wanted to...or wanted us to...to send out notice to the other PRP's who never show, I'm sure we could do that for the part of the meeting you guys are at. Let me check. That said, I think we want folks to be able to have a good,
  frank conversation, so we don't want it to be a "public" meeting with press etc.

> Subject: FW: Follow up meeting with PCI (sf)
> See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They are the people as all PH
PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience.

> Subject: [EXTERNAL] Follow up meeting with PCI (sf)
> Hello Howard,
> Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last week. Would the date of October 18 or 30th work for you all? On a related note, could other PCI members
participate in case they have the same/similar questions, e.g. public entities?
   Thank you.

Flag:
              Follow up
Yes October 18th we'll come to Portland if you can find a location. Our Portland office conference room
is booked
Thanks
Sheryl Bilbrey

                                      Yes the group from July to talk tech followup but other issues as well (we're working on
 agenda).
                                        Presume 18th is better so we'll plan on that.
> We have everyone who participates at PCI including port, city, state etc. If you wanted to...or wanted us to...to send out notice to the other PRP's who never show, I'm sure we could do that for the part of the meeting you guys are at. Let me check. That said, I think we want folks to be able to have a good, frank conversation, so we don't want it to be a "public" meeting with press etc.

       See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a
follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They wanted the property that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They wanted the property that they were planning to meet with property that they were as all PH
 PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like
 they're focusing on the Pre-RD Group members unless we want to broaden the audience.

Hi Rich

As you know the Feds are on Holiday this Wed. We've put in a request for an exception to allow us to work but it may not be granted. Do you have a PCI meeting in January that we could go to if we are not allowed to work on Wed? I'll keep you posted as soon as I hear anything. Sorry!

For oct 18 yes pls on room. Let me check on our room size for dec. Not sure what hotel we're at. You
guys don't have anything big enough in Portland office right?

Subject: Re: Follow up meeting with PCI (sf)
My bad. Yes the group from July to talk tech followup but other issues as well (we're working on
agenda).
                                 Presume 18th is better so we'll plan on that.
We have everyone who participates at PCI including port, city, state etc. If you wanted to...or wanted us
to...to send out notice to the other PRP's who never show, I'm sure we could do that for the part of the meeting you guys are at. Let me check. That said, I think we want folks to be able to have a good, frank conversation, so we don't want it to be a "public" meeting with press etc.

I may be the one who's confused. I thought you and I talked about another technical meeting but if we
need to meet with group from July that's fine. It's really up to you all.
On a related note - as I mentioned we are agreeable to coming to your meeting on the 5th or 6th but also
need to reach the PRPs that are not in the PCI group. Would you be willing to invite others or do we need to hold a separate meeting after December for all the PRPs?

Subject: Fwd: Follow up meeting with PCI (sf)

Is this the group mtg you and II were discussing which was the same group we had in July or is this another tech mtg? Just confused.

We proposed a mtg on 18th to 19 of Oct with the group from July, not just tech.

How does this fit in with any discussion you have had with Sheryl as to the next meeting? Note this comes from Sean (at Sheryl's request) and the opening for other PCI members to participate - specifically mentioning public entities.

Subject: FW: Follow up meeting with PCI (sf)

See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They variously described their intended audience as all PH PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience.

Subject: [EXTERNAL] Follow up meeting with PCI (sf)

Hello Howard,

Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last week. Would the date of October 18 or 30th work for you all? On a related note, could other PCI members participate in case they have the same/similar questions, e.g. public entities?

Thank you.

S

Correct that you don't have a room at epa Portland that can hold that size group, right? (PCI mtg in Dec is in Portland, not Seattle. Oct 18 meeting we will come to you in Seattle). I may be the one who's confused. I thought you and I talked about another technical meeting but if we need to meet with group from July that's fine. It's really up to you all.

On a related note - as I mentioned we are agreeable to coming to your meeting on the 5th or 6th but also need to reach the PRPs that are not in the PCI group. Would you be willing to invite others or do we need to hold a separate meeting after December for all the PRPs?

Subject: Fwd: Follow up meeting with PCI (sf)

Is this the group mtg you and II were discussing which was the same group we had in July or is this another tech mtg? Just confused.

We proposed a mtg on 18th to 19 of Oct with the group from July, not just tech.

Subject: FW: Follow up meeting with PCI (sf)

How does this fit in with any discussion you have had with Sheryl as to the next meeting? Note this comes from Sean (at Sheryl's request) and the opening for other PCI members to participate - specifically mentioning public entities.

Subject: FW: Follow up meeting with PCI (sf)

See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They variously described their intended audience as all PH PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience.

Subject: [EXTERNAL] Follow up meeting with PCI (sf)

Hello Howard,

Sheryl asked me to get back to you regarding a meeting to follow up on our positive discussions last week. Would the date of October 18 or 30th work for you all? On a related note, could other PCI members participate in case they have the same/similar questions, e.g. public entities?

Thank you.

S

Sent: Monday, September 24, 2018 2:38 PM To: Bilbrey, Sheryl <Bilbrey.Sheryl@epa.gov> Subject: Re: Follow up meeting with PCI (sf)

My bad. Yes the group from July to talk tech followup but other issues as well (we're working on agenda). Presume 18th is better so we'll plan on that.

We have everyone who participates at PCI including port, city, state etc. If you wanted to...or wanted us to...to send out notice to the other PRP's who never show, I'm sure we could do that for the part of the meeting you guys are at. Let me check. That said, I think we want folks to be able to have a good, frank conversation, so we don't want it to be a "public" meeting with press etc.

I may be the one who's confused. I thought you and I talked about another technical meeting but if we need to meet with group from July that's fine. It's really up to you all.

On a related note - as I mentioned we are agreeable to coming to your meeting on the 5th or 6th but also need to reach the PRPs that are not in the PCI group. Would you be willing to invite others or do we need to hold a separate meeting after December for all the PRPs?

Is this the group mtg you and II were discussing which was the same group we had in July or is this another tech mtg? Just confused.

We proposed a mtg on 18th to 19 of Oct with the group from July, not just tech.

Note this comes from Sean (at Sheryl's request) and the opening for other PCI members to participate - specifically mentioning public entities. From: Mat Cusma Sent: Monday, September 24, 2018 1:34 PM To: Peter Saba <psaba@schn.com<mailto:psaba@schn.com><mailto:psaba@schn.com>> Cc: Greg Christianson <greg.christianson@morganlewis.com<mailto:greg.christianson@morganlewis.com><mailto:greg.christianson@mor</pre> ganlewis.com>> Subject: FW: Follow up meeting with PCI (sf) See below - FYI. While Sean's email makes it sound like Howard or another of our entourage asked for a follow-up meeting, but that's not the case. On the contrary, EPA Region 10 staff mentioned several times during our "flexibility" meeting that they were planning to meet with PRPs in October once they found a venue large enough to hold enough people. They variously described their intended audience as all PH PRPs, the PCI Group members, and at one point (I believe) the public at large. Here it sounds like they're focusing on the Pre-RD Group members unless we want to broaden the audience. Washington, DC 20460

Dear Mr. Cook,

AF&PA has been invited to participate in EPA's America Recycles Day Summit on November 15. Paper recycling is a key issue for AF&PA and our members in the paper industry.

The American Forest & Paper Association (AF&PA) serves to advance a sustainable U.S. pulp, paper, packaging, tissue and wood products manufacturing industry through fact-based public policy and marketplace advocacy. AF&PA member companies make products essential for everyday life from renewable and recyclable resources and are committed to continuous improvement through the industry's sustainability initiative —Better Practices, Better Planet 2020. The forest products industry accounts for approximately four percent of the total U.S. manufacturing GDP, manufactures nearly \$300 billion in products annually and employs approximately 950,000 men and women. The industry meets a payroll of approximately \$55 billion annually and is among the top 10 manufacturing sector employers in 45 states.

In 2017, paper mills in the U.S. consumed nearly 30 million tons of recovered paper to make everything from corrugated boxes to paperboard packaging to printing papers and tissue.

In advance of the November 15 event, we would appreciate meeting with you to provide background information on the paper industry and discuss recovered paper markets, the effects of China's National Sword import policy, the work the industry is doing to promote increased recovery of E-commerce packaging and industry recommendations for building effective community recycling programs.

We are available to meet any time on Tuesday, October 30 or Friday, November 2.

Thank you.

Sincerely.

Elizabeth Bartheld Vice President Government and Industry Affairs

Subject: RE: Superfund Reform Panel

Nicholas, I am afraid only Thursday works for me. We have had a call to discuss format and logistics but another call would be productive. Here are the two papers that have been prepared as drafts thus far. The final papers are due on 28 September. Here is the proposed agenda and timing for the discussions by the panel members.

Look forward to the call. Hope we can find a time that works for everyone. Apologies for not sending you the email message noted below.

Best

Mike Kavanaugh

Dear Panel,

Thanks for participating in the call to organize our panel discussion.

I look forward to receiving your draft papers and as discussed, will distribute them to all panel members.

With respect to speaker sequence and timing for the session, per our discussion, I propose the following allocation:

| Topic | Proposed time (pm) |
|---------------|--------------------------------|
| Introduction | 2:15 – 2:25 |
| Prepared talk | 2:25 – 2:45 |
| Prepared talk | 2:45 - 3:00 |
| Prepared talk | 3:00 - 3:15 |
| | <i>3:15 – 3:45</i> |
| | Prepared talk Prepared talk |

The goal is to provide 30 minutes for Q&A from audience, given the expected high level of interest in the topic and sufficient time for Steve Cook to provide the current EPA focus on Superfund Reform.

Please confirm that this allocation is acceptable and organize your presentation to meet these constraints. I will be concise with introductions and opening remarks.

I usually estimate 1.5 minutes per slide if you are using a powerpoint presentation.

I suggested a goal of 11 October to send me your powerpoint presentation, so that I can organize the folder continuing the ppt files for submittal to ABA organizers. Allison Read should confirm that this approach is acceptable.

Thanks in advance and look forward to meeting you in San Diego in October.

Subject: Superfund Reform Panel

Team,

I hope this note finds you well and in good spirit. Our Superfund Reform Panel is coming up on October 18 in San Diego. In advance, I would propose that we have a preliminary call to go over logistics, format, issues on which we should focus and questions that should get asked. It would also be good to meet one another in advance of the panel.

I would propose a half hour call. Could you let me know which of the following dates would be best for you?

- 1. Tuesday, Oct. 2, 8:30 am Pacific
- 2. Wednesday, Oct. 3, 9:00 am Pacific
- 3. Thursday, Oct. 4., 9:00 am Pacific.

If none of these times/dates is convenient, please propose a different times. If I can be of any help, please call me on cell 415-971-8001.

Best regards,

Nicholas

Subject: RE: Superfund Reform Panel

Nicholas, I am afraid only Thursday works for me. We have had a call to discuss format and logistics but another call would be productive. Here are the two papers that have been prepared as drafts thus far. The final papers are due on 28 September. Here is the proposed agenda and timing for the discussions by the panel members.

Look forward to the call. Hope we can find a time that works for everyone. Apologies for not sending you the email message noted below.

Best

Mike Kavanaugh

Dear Panel,

Thanks for participating in the call to organize our panel discussion.

I look forward to receiving your draft papers and as discussed, will distribute them to all panel members.

With respect to speaker sequence and timing for the session, per our discussion, I propose the following allocation:

SpeakerTopicProposed time (pm)Mike KavanaughIntroduction2:15-2:25Steve CookPrepared talk2:25-2:45Todd DavisPrepared talk2:45-3:00Jessica MerriganPrepared talk3:00-3:15Q&A-All3:15-3:45

The goal is to provide 30 minutes for Q&A from audience, given the expected high level of interest in the topic and sufficient time for Steve Cook to provide the current EPA focus on Superfund Reform.

Please confirm that this allocation is acceptable and organize your presentation to meet these constraints. I will be concise with introductions and opening remarks.

I usually estimate 1.5 minutes per slide if you are using a powerpoint presentation.

I suggested a goal of 11 October to send me your powerpoint presentation, so that I can organize the folder continuing the ppt files for submittal to ABA organizers. Allison Read should confirm that this approach is acceptable.

Thanks in advance and look forward to meeting you in San Diego in October.

Subject: Superfund Reform Panel

Team,

I hope this note finds you well and in good spirit. Our Superfund Reform Panel is coming up on October 18 in San Diego. In advance, I would propose that we have a preliminary call to go over logistics, format, issues on which we should focus and questions that should get asked. It would also be good to meet one another in advance of the panel.

I would propose a half hour call. Could you let me know which of the following dates would be best for you?

- 1. Tuesday, Oct. 2, 8:30 am Pacific
- 2. Wednesday, Oct. 3, 9:00 am Pacific
- 3. Thursday, Oct. 4., 9:00 am Pacific.

If none of these times/dates is convenient, please propose a different times. If I can be of any help, please call me on cell 415-971-8001.

Best regards,

Nicholas

Hi Jim,

I hope you are doing well. The Alliance to Restore Our Waterways (AROW) has reviewed the Agency's initial steps in developing an adaptive management guidance, and we would like to further discuss the definition, criteria and principles of adaptive management.

Please let us know if you are free to meet with the group on Dec. 11, 12 or 13. The 12th is preferable for us.

Thank you, Marissa

Subject: AROW Meeting Request - Dec. 11, 12 or 13

Hi Jim,

I hope you are doing well. The Alliance to Restore Our Waterways (AROW) has reviewed the Agency's initial steps in developing an adaptive management guidance, and we would like to further discuss the definition, criteria and principles of adaptive management.

Please let us know if you are free to meet with the group on Dec. 11, 12 or 13. The 12^{th} is preferable for us.

Thank you, Marissa

Subject: RE: Oct. 18 Meeting Agenda and Attendees

Thank you for the updated list of attendees and updated agenda. My only suggestion on the agenda is to reverse the order of Items III and IV so that the PCI Group members attending that are not Pre-RD AOC signatories can participate in discussion of the planning on the PCI Group meeting and can then depart prior to discussion of the unviaidated data issue.

Subject: RE: Oct. 18 Meeting Agenda and Attendees

Davis & Sheryl,

I am working on finalizing our meeting logistics for Thursday, October 18.

Ken Tyrrell, Project Coordinator – Portland Harbor, from AECOM will join in person for the Pre-RD Work discussion (focused on unvalidated data request) scheduled for the last part of the meeting, tentatively Noon to 1 PM.

The senior chemist (Karen Mixon) and data management expert (Mike Surowiec) will join for that part of the meeting by phone.

To ensure that we have sufficient room in the conference room please advise the anticipated EPA attendees. I will circulate a dial-in once we have reconfirmed the location.

Thanks, Peter

Subject: Oct. 18 Meeting Agenda and Attendees

ENFORCEMENT CONFIDENTIAL

Sheryl & Davis,

As requested attached is a proposed agenda for the meeting on October 18.

Please note that a draft of the agenda was circulated and discussed with a subcommittee of representatives of the PCI Private Business Group and that this draft is being shared with the PCI Private Business Group.

The PCI Private Business Group is a group of businesses in and around the Portland Harbor Superfund Site which span a range of industries across different sectors of the economy. The PCI Private Business Group does not include the City of Portland, State of Oregon or the United States. The statements made and views contained in the attached document are those of the PCI Private Business Group, and no statement or view expressed in the attached document is made on behalf of the identified public entities.

Set forth below is a list of the attendees. We are not anticipating having anyone participate by phone, but can set up a dial-in if EPA needs one.

As previously discussed with Sheryl, we are planning to set aside the last part of the meeting (we would suggest the last hour) for a discussion just involving Pre-RD AOC Group Participants and EPA on Pre-RD Work matters, particularly the EPA request for all unvalidated data and how best to meet EPA's data needs while minimizing some of the concerns we have. At the end of the day, we share a common objective here which is the collection and reporting of accurate and reliable data regarding current conditions at the Site to inform the remediation, which data is accepted by EPA, the PRPs and the larger community. We anticipate Ken Tyrrell and one or two of his team that are involved in the data management effort to join us for that portion of the meeting. Once I have confirmed with Ken who will be attending, we will provide that info as well.

Please let me know if you have any questions on the agenda or the meeting logistics.

Best,

Peter
